

Custom-Branded Hotel Bike Share in 4 Easy Steps

Give Your Guests Something Else to Smile About.

Bike fleets are a great way for your guests to have fun while they explore your area at their own pace. Bicycles also demonstrate your commitment to sustainability and the environment, and help reduce trips by car.

At On Bike Share, we've made it easy for you to put high quality branded bikes on your property that you can be proud of. Our bikes are not only attractive and fun to ride, but they also use an innovative locking system that makes them easy and secure for sharing. Plus, we provide affordable, on-site bike maintenance plans to help you keep your bikes safe and ready to ride.

Have questions? Contact us at info@onbikeshare.com or at 401-475-8094.

1

Decide Your Fleet Size

Not sure how many bikes you need? A good starting point is a ratio of about 1 bike for every 20-25 rooms in your hotel. Note that you can always expand your fleet based on demand, so if this is your first experience with bike share, no need to over-invest. Even a small bike fleet can have a big impact. For most hotels, they can buy a complete customized bike share system for about \$340 per room, with no recurring fees.

2

Branding Your Bikes

Show off your hotel brand everywhere the bikes go! Our white bicycle frames really show off your logo on the bike frame and basket panels. Want to see what the bikes will look like with your logo, send us your logo artwork and we'll create a mockup. Contact us for information on file formats for artwork.

If you want to add more color to the bikes, we can also custom paint the fenders and chainguard to match your logo.

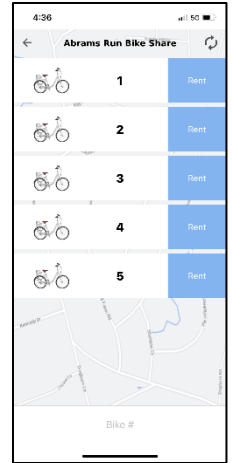

3

Sharing Made Simple

Our system makes it easy for guest to checkout bikes at their leisure using the On Bike Share App. Guests can join your bike share program and use a password that you provide to unlock bikes. This allows you to limit access to only hotel guests.

Our bikes also include a secondary lock built onto the frame. This allows guests to secure the bike while they shop, eat, etc. The lock's security key feature traps the key in the lock while riding. The only time they handle the key is when the bike is locked up.

4

Bike Maintenance

Regular bike inspections and tune-ups ensure bike safety, prolong the life of the bike, and maximize bike availability.

Let us help. We provide on-site monthly maintenance plans performed by certified and insured bike mechanics.

Interested in a Bike Fleet without the App and docking system?

No problem. Our bikes include a lock built onto the frame that you can use to secure and access the bikes. You keep the keys at a central desk and hand out keys – a like a library system. It simple and secure.
